Exeter City Football Club K25 and Fire Rated Roller Shutters

As our local and growing League 2 professional football club, Exeter City Football club chose HVP Shutters to provide a number of different shutter solutions including Fire shutters as well as manual and aluminium shutters for general use.

The work was to cover the upgrade of the stand, which included 5 new food concession on the underneath of the stand, which required the K25 security shutters.

Our Fire shutters were connected and activated to the fire alarm system as part of the overall fire strategy. HVP supply a number of fire shutters depending on the situation and opening, including servery openings to large Industrial openings. The different ratings for fire shutters include 1 to 4 hours and can be operated by multiple different methods.

The K25 shutter is an all round shutter that can be manual or electrical operated and used in a variety of applications. The K25 comes in a number of different finishes from perforated or slotted to a solid finish, it is also available in almost every colour.
