Brighton Iconic Shelter Hall

The multi million pound project is part of the council's Seafront Investment Programme.

After two years of work to demolish the original building, strengthen the historic Kings Road arches, support the upper promenade and prevent the seafront road from collapse, the new Shelter Hall is emerging from behind the hoardings.

As part of the redevelopment HVP were asked to provide ten of their Armourshield style shutter that suited the redevelopment perfectly. Armourshield shutters offer security with style. With a more classic look than other roller shutters, the Armourshield allowed the Council and planners to keep the style of the building whilst still being able to secure it.
