Michael Spiers, Exeter

The Michael Spiers branch in Exeter is based in Cathedral Square so when they needed roller shutters to secure the high end jewellers they needed something to suit the cathedral setting as well as making sure they could secure the premises.

Choosing to install our Viewguard micro perforated roller shutters in black on the interior of the store made sure that the shutters blended in with the rest of the shop front as well as suited the location of the shutters.

We have since worked on the Michael Spiers in Taunton and Truro giving the Brand security with our quality roller shutters.
